

MATERIAL GUIDE

There is a common misperception that plastics use a large amount of the world's petroleum. Less than 4% of the world's oil production goes to produce all types of plastics. PET accounts for less than 1/2 of 1 percent. Because PET is fully recyclable, it's a highly sustainable material. Every time a PET container is recycled, its petroleum feedstocks can be recaptured and reused.*

MELAMINE
Outperforms traditional ceramic and proven to be 4x stronger. Chip and break resistant, ideal for event caterers. A favourite for waiting staff as look like ceramic but with half the weight.

POLYETHYLENE TEREPHTHALATE (PET)
The most widely recycled plastic in the world. Prized for its strength, thermo-stability, and transparency, PET is a popular choice for packaging. PET is also inexpensive, lightweight, resealable, shatter-resistant and recyclable.

POLYSTYRENE (PS)
100% recyclable. Our range of PS products are reusable and not intended for single use. Our most popular platter range for caterers who need a reliable solution. Strong, lightweight, ideal for canapes and outdoor events. Event caterers number one choice of platter.

PINEWOOD
Completely biodegradable and compostable. So if you are looking for an all-natural way to serve side dishes that will leave a lasting impression without lasting in a landfill for years to come, look no further.

FRACTURE GASTRO PLATTERS

The shallow well affords edge to edge display, without food falling off the platter. Its seamless smooth feet have been designed to glide across surfaces without scratching or catching. The range works with our Gastronorm lids for easy transportation, supporting the stacking of multiple trays. Available in the translucent green and black glass effects.
